The indictments against them are based upon the grounds that the kuklux law having been declared unconstitutional by the highest court in the land, the arrests were made without any authority of law. These cases show that it is not only the Landraht negroes of the country who do not know that the kuklux law has been repudiated and has deal letter on the statutes, but that there are some deputy marshals, commissioners and even United States attorneys who are worse than the negroes, and as it is naturally presumed, by their filling those offices, to know the law, there is but one conclusion from their action in these case; that is, they are more knaves than lools. They are prompted by malicious motives or blind partisan purposes. The court before which they are tri-d should give them such punishment as will teach them their duty. So long as the department of justice keeps such men in its employ, they should be made to know that the state courts will see that they keep within the limit of their authority.—[Marshall Herald. shull Herald.

Its a remarkable fact that property in the country has increased much more rapidly than in the cities of Texas. Gaiveston, with \$19,000,000 worth of property only shows an increase of \$1,000,000,and Ban Antonio with increase of \$1,000,000, and Ban Antonio with \$14,000,000 worth of property, has an increase of \$2,000,000, while Bell county how a over \$2,250,000 increase on a total of \$5,000,000 worth of preperty in 1882, and Edis county shows an increase of \$2,000,000 on a total assessment of \$7,000,000 in 1882. The per centage of increase in the counties and cities named is about as follows: Galveston 5 per cent. San Antonio 14 per cent. Ellis county 25 per cent, and Bell county 45 per cent. In Hunt county the increase has been about 20 per cent, the total as sessment in 1882 being \$3,300,000 and in 1883, \$3,900,000. In the above we cite two of the most prosperous counties in which are no large cities. perous counties in which are no large cities. It is a lair comparison between the cities and the country and the result shows that and the country and the result shows that the great boom which has caused Texas to jump from \$419.000,000 worth of taxable properly in 1882 to over \$500.00.000 in 1883, results principally from the development of the istent resources of the magnificent agricultural and pastorol domain of the Lone Star State. The Texas cities are all growing, but they are scarcely keeping up with the country—[Greenville Banner.

There is another fact which deserves consideration. There were only forty-six democratic members in the XLVIIth congress from the eastern, north-ra and western states, while there will be ninety-one in the XLVIIIth congress. This increase of northern democratic sen inent must have great weight towards keeping the irreconciliables in order. The north and west have great weight towards keeping the irreconcilables in order. The north and west will be the battle ground in the presidential election of 1884 and the democrats of those sections generally look to the future.
